Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. **Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.**

3. The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. **Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi et al. (US 6,049,787).**

6. As per **independent Claim 1**, Takahashi discloses a supply chain linkage management system (Abstract) consists of; the transmission layer which transmits and receives transaction information exchanged among companies and organizations using the communications networks, such as the Internet (C3-C4, Transaction System); the business logic layer which performs check of the contents of a message information, and the management of a message flow/workflow based on operating process rule information, sales channel information, physical distribution information, etc., which are transmitted and received from the transmission layer (C3-C4, Notarization); the linkage management layer which performs the tracking (tracing) of demand information and supply information, and of inventory transition, by linking the message information received from the business logic layer. The linkage management layer consists of; the linkage execution module to model the message information into "demand information", "supply information", "inventory information", and "production information"; the linkage logic module which processes the message information received from the business logic layer so that the data structure and the linkage rule of the linkage execution module may be suited and which passes to the linkage execution module; the demand and supply tracking module which creates tracking information based on linked information created by the linkage execution module (Figs. 1-10; C3-C4, Center Site).
